Here and There

Reduced fares to cover the
12th day week-end from Aug.
11 to 12 noon Monday, Sept. 3.
I have been authorized on the
Canadian Pacific Railway between
11 stations in Canada. Round
trip tickets will be at the rate
of fare and a quarter and will be
good until midnight, Tuesday,
September 4.

Returning from White City,
London, Eng., aboard Canadian
Pacific liner Montcalm, the ath-
letes who represented Canada
at the British Empire games came
back practically in a body to the
number of around 100. They
sailed for England aboard the
Duchess of York July 20.

Australia is showing very sub-
stantial evidence of recovery with
continued betterment in sight, is
the view of John P. Brophy, Com-
monwealth Trade Representative
at New York, stated when inter-
viewed aboard S.S. Niagara on
arrival recently at Victoria.

Fifty per cent. ahead of last
year at mid-August, with pros-
pects for balance of season ex-
ceptionally good for the Canadian
Pacific hotels and resorts in the
Rockies is reported by A. E. Robert-
son, assistant general manager,
in charge of the company's west-
ern hotels.

THE PROPER CARE OF YOUR AUTOMOBILE

Fenders

THE most common mishap among
motorists is of a minor nature,
damage to fenders, but is one which
is liable to develop into a more
serious matter if neglected. When
fenders become scratched or scrap-
ed they should be retouched
promptly to prevent rusting, be-
cause if neglected the rust is liable
to eat its way through the metal.
If the fender is black, it should be
finished with an enamel which dries
with a color and lustre closely re-
sembling the newly laked enamel.

Before the scraped parts are re-

touched the metal should be thor-
oughly cleaned to remove all
grease, dirt and rust. If the edges
of the abrasion are smoothed down
with fine sandpaper or steel wool
it will give a better looking job.
It is wise, also, to retouch worn
spots on the tire carrier, bumper
straps, shock absorbers, and other
parts which are finished in black.
If you also touch up bolts and nuts
which are used for installing
bumpers, license plates, etc., it will
be easier to remove the nuts should
they need replacement.

RUSSIAN WHEAT SITUATION

(Annual Average Wheat Production 890 Million Bushels)

It is estimated that since 1916 the population in
Russia has increased by at least 25 million persons,
which means that Russia's annual requirements of
wheat are at least 125 million bushels per annum
more at this time than they were in 1916. Her production of wheat in
1916 is not accurately known, but it can be said with fair accuracy
that the average annual production for the past two or three years has
been very little, if any, greater than it was before the War in 1913 and
1914. Thus it will be seen that Russia easily requires all the wheat she
is now producing for the use of her own people. Russia, therefore,
should not be, on the average, a serious competitor in world wheat
markets.

The Schools Re-open.

Stony Plain's two schools re-
opened on Tuesday morning, the
4th. At S.P. H. Miss Woods is in
charge, with Miss Eversman as as-
sistant.

Over at the Public school the
staff consists of Mr. D. E. Moyer
and the Misses Colliott and Mc-
Donald.

Each school has practically the
same number of pupils enrolled as
last year.

Building Operations.

Work has commenced on build-
ing the addition to Kelly's Hall.
The present building will be ex-
tended back to the lane—some 31
feet, giving a much larger floor
space in the hall for the holding of
dances and other forms of enter-
tainment. Mr. Adam Mohr has the
contract in hand, and it is expected
that work on the extension will be
rushed thru. When completed, Mr.
Kelly intends putting on a big
dance which will prove to be the
event of the season.

The Oldtime Dance.

A good-sized delegation from
town attended the Oldtime dance
in Onaway on Friday night, and
had a very enjoyable time. It was
expected some of Stony's fiddle-
players would enter in the com-
petition for rural violinists, but
none of them contested, altho the
good prizes, offered should have
been some inducement.

How About 'Em?

If you intend motoring to the
City, how are the brakes on your
car working? Stationed at vari-
ous strategic points in the City
of Edmonton, City police are on
watch and have started a brake-
testing campaign, which is likely
to continue all through next week,
as well.

Get Your Cat Registered.

The new section of the
Criminal Code of Canada, re-
lating to the registration of
pistols, has been proclaimed
to be in force, it is stated. All
owners of pistols must have
these registered with Police.
Even if the guns are kept in
private homes they must be
registered. A fine of \$50 and
costs or 30 days' imprison-
ment, or both, is the penalty
for an infraction of the clause.

At Kelly's Hall, Tonight.

The feature film for this Thurs-
day evening, "I Was A Spy," at
Kelly's Hall, movie fans will note
is on a new order for this theater.
It is a British production, and is
said to be the greatest spy story
which has ever been filmed—it be-
ing romantic, startling, magnifi-
cent, and it's true. Those artists to
be seen in the production are Mad-
geffe Carroll, Herbert Marshall,
and Conrad Veidt.

Last week's showing, "Storm
at Daybreak" was noted for the
fine performance of the stars, Kay
Francis and Nils Asther, the mag-
nificent scenic backing, and the in-
spiring military music. The fore-
picture "The News Hound" was a
very interesting film, with many
ludicrous situations and lots of
laughs.

Soviet Claims Scouted

Claims from Moscow that Russia had usurped second place among the world's gold producing countries, superceding Canada, has been received with almost universal scepticism. Apparently, the statement has been interpreted as just another of those efforts in propagandism with which Soviet authorities key their nationals to further sacrifices, but which singularly fail to impress the outside world.

During progress of the first five year plan, Moscow deluged the world with claims of amazing achievement, which, now that the ardors of the period have subsided, are being assessed at their true worth. There is no gainsaying the great advances made in certain industries, particularly the so-called heavy industries, under the program initiated by Lenin and carried into effect by Stalin. In some instances these have been spectacular, but (and this is the rub) seldom have they been quite as significant or outstanding as the claims made concerning them.

Several of the leading magazines and newspapers of Britain and America are devoting considerable space to reviewing the Soviet industrial and agricultural achievement. These have been equitable, unprejudiced and, probably based upon the true facts, for truth and not agitational propaganda is what the public seeks these days. The claims made on behalf of socialized endeavor by proponents of Socialism of the Russian variety, apparently do not stand the test of statistical investigation. Alan Monkhouse, one of the British engineers sacrificed for propaganda purposes in the notorious sabotage trials of a year or so ago, in a book of his experiences in Russia is surprisingly sympathetic to the Soviet planning scheme in the light of the circumstances preceding his deportations. Paying some attention to the statistical record of industrial achievement, he shows that the Soviet government's own figures in specialized lines such as house building do not compare favorably with similar achievements in capitalist and individualistic England, recorded at the same time. He cites several particulars in which Soviet authorities claimed to have out-distanced their degenerate and collapsing capitalist contemporaries, which are not substantiated by the facts.

Apparently, the same is true of the gold production, backed by Russia threats that, having overtaken Canada they will shortly overtake and pass South Africa in production of the precious metal. In reply to this, Canadian mining authorities maintain that, while undoubtedly Russia has been creeping up in production, it has not yet supplanted Canada as ranking second in production of newly mined gold. Much of the Russian gold, it is claimed, was withdrawn from hoarding and, therefore, it is old gold reclaimed.

South Africans scoff at what they term a bombastic claim, and have no fear of losing premier place among the world's gold producers. This contention is backed by Dr. P. S. Nazzari, formerly a famous Russian geologist and now a fugitive from the Bolsheviks. His statement, based on actual knowledge of the various Russian goldfields and not upon political bias, is to the effect that nowhere in Russia do gold-laden bodies occur with the regularity and in the volume seen on the Rand in South Africa. "If Russian gold fields ever reach the stage of providing competition for South Africa it will be at tremendous cost of time and labor of transportation," he concludes.

Rebuilding Viking Boat

Oak Timbers Intact After Being Submerged Thousand Years

A Viking boat has been "reconditioned" at Danzig, after one thousand years, and workmen engaged in digging a ditch at Oliva found the remains of the boat only five feet beneath the surface of the ground. The sturdy oak planks of which the boat was originally built had defied the ravages of time so successfully that it has been possible to reconstruct the vessel in its entirety. The boat is thirty feet long, with places for eighteen oarsmen. Iron nails had been used in the making, as well as wooden pegs. Parts of the gunwales, with the original rowlocks, have survived, and much of the masts with which the seams were packed to make them water-tight is still in place.

A new machine determines scientifically how sharp a razor blade is, how much it is dulled by use in shaving, and how successfully it can be resharpened.

Wine must come from a limited area of France to be legally called champagne.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Loosening of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Drugs in Garden Flowers

Many Are Valuable For Something Apart From Beauty

Most gardens contain at least one flower whose value to mankind is not to be estimated simply in terms of beauty. The leaves of the statice, foxglove yield the drug digitalin, which still has no superior as a cure for heart disease or dropsy. The crocus is the basis of a preparation for gout sufferers, and the lobelia tenders good service as a balm for whooping cough. Then what a store is the monkshood! Its attractive blue flowers conceal a deadly poison, aconitum, one-sixteenth of a grain of which will kill a man. But like other garden drugs, this virulent member, scientifically controlled, is invaluable in the treatment of fevers and acute neuralgia.

Or Even A House

"Automobile owners will leave their vehicles unclamped with keys at hand and then complain to the police when someone borrows or steals them," remarks the St. Thomas Times-Journal. Well, why should it be necessary to lock a car, and not a horse and buggy? says the Woodstock Sentinel-Review.

Was In Two Rebellions

Alberta Veteran Carried Despatches For General Strange

In Alberta 50 years ago, when highwaymen were just fading from the western frontier with the coming of the first Northwest Mounted Police, and when Indians were still on the warpath often, Charles F. Stewart drove the mail stage. Now 69 and retired, he lives at Edmonton. Native of the prairies, he saw two rebellions at first hand. Son of the chief factor of the Hudson's Bay Co., he was a lad of eight and lived a few miles below Fort Garry (later Winnipeg) in the troublous days of the first Red River rebellion. He can recall seeing the soldiers coming up the Red river. As a youth of 20, when the mails were stopped by the Saskatchewan rebellion of 1885, he went on the courier line, carrying despatches for General Strange's Alberta field force. He made several trips on horseback between Saddle Lake and Fort Pitt.

His predecessor on the mail job, Peter Campbell, was on the driver's seat when the Calgary coach was held up and the mails robbed by highwaymen in the only case of its kind in this part of the west.

It was no picturesque coach that was in use in 1891 but a lumber wagon with an open centre for package freight and a closed cabin on the rear that accommodated six passengers. An average of 40 miles of trail was covered each day by the plodding team and numerous creeks and streams were forded en route.

Proposed Tax On Noise

Idea Of British Ministry Of Transport May Save Nerves

A tax on noise is proposed to save the nerves of the people of the United Kingdom. It is thought that taxation may succeed where all appeals have failed in the matter of unnecessary noise, and the suggestion of a tax was made in a letter from Leslie Hore-Belisha, minister of transport, which was read at a conference of the Anti-Noise League at Oxford. "All new heavy motor cars put on the road since January, 1933, have to be fitted with pneumatic tires," he wrote, "and the scales of taxation have been so framed as to give a strong incentive to people to substitute pneumatic tires on existing vehicles. The heavy vehicle on solid tires which caused so much unnecessary noise in the past is rapidly disappearing."

"Regulations also forbid the use of motor vehicles and trailers which have caused excessive noises, and the sounding of horns on stationary vehicles."

"The road traffic bill proposed further to prohibit the use of the horn in prescribed hours and zones of silence." Mr. Hore-Belisha stated that in order to gain exact knowledge of what really causes noise the ministry has invoked the best scientific assistance. He expressed the hope the motor manufacturing industry will co-operate with the government in a determined effort to find a remedy for present unnecessary and harmful noises.

Looked The Part

He was a golfer who always played in his oldest clothes. One day he set out for the course, his club slung over his shoulder.

Walking down a street he saw a woman leaning over her garden gate, eyeing his approach angrily.

"You're very late," she said, sharply, as he drew level.

"Late?" echoed the astonished golfer.

"Yes, late! You promised to sweep my chimneys at eight, and it's past nine o'clock now!"

Around The World Cruise

Cunard White Star Liner To Make Interesting Calls At Many Ports

Preliminary enquiries throughout America indicate that the 1933 Around the World Cruise of the Cunard White Star liner Franconia will follow the route around the Southern Hemisphere as she has done during the past two seasons. The liner will leave New York on Saturday, Jan. 12, and sail south for her first port of call at Kingston, Jamaica. Here there will be a drive to Spanish Town and other points of interest for passengers.

After leaving Jamaica on the 16th the Franconia arrives at Panama on the 18th, calling at Cristobal. A daylight passage of the Panama Canal is made, with an auto drive to Colon, Ancon, Panama City and Old Panama.

The Franconia calls at San Pedro in California to allow Westerners to embark for the cruise and also to permit the Pacific liner Franconia will call at the Hawaiian Islands, where two days will be spent from Feb. 2 to Feb. 4. The itinerary here calls for tours to Hilo and Honolulu, the Lave Tubes, the Kilauea Volcano, Kilauea Forest, Diamond Head and Waikiki Beach. An unusual call will be made in the Society Islands at Papeete (Tahiti). Here preparations are being made for entertainment and dancing by natives to amuse the passengers. Cook Islands will be visited two days later and there will be a motor drive in the island of Rarotonga, with native dancing at the capital, Rarotonga.

Recalling the late Louis Stevenson, a visit will be made to Valparaiso, his home in Apia. In the Samoa Islands the famous "Upa" or native dance will be performed in Apia.

The Franconia then sails on to the Fiji Islands, with a motor drive into the interior where there will be "Kekes" or tribal dances performed. The Franconia will also visit Australia. Five days will be spent in New Zealand; commencing with a motor drive to Auckland, a two days inland tour to Rotorua and the famous Thermal district, with visits to Mount Taupo. Two days will be spent in Australia, with motor drives in and around Sydney, including visits to the famous beaches, the New Bridge, Koala Bear Farm and the celebrated Zoo. A special exhibition of native growing will be arranged at the native settlement of La Perouse. There will be an optional motor drive over the Blue Mountains to Mount Victoria and the Jenolan Caves.

March 1 finds the Franconia at Port Moresby (Papua) New Guinea. A visit to the Papuan village at Handanda will include tribal dances and native music. Another unusual port of call for the Franconia will be in the Lesser Sunda Islands with a visit there to Bali at Telok Padang with visits to temples and magnificent scenic points. There will be an exhibition here of native arts and crafts and Balinese dancing. Two days will be spent in Java. There will be an auto drive around Semarang to Batavia and Buitenzorg, visiting the famous Botanical Garden.

The Franconia will call at Singapore, March 24. There will be visits to points of interest in the Straits, the Botanical Gardens, for instance, and Penang Hill. The Franconia sets sail to South India arriving at Madras on the 30th and calls at Ceylon early in April. There will be visits in and around Ceylon and Mt. Lavinia, as well as to Kandy and the Botanical Gardens. A unique drive will be Port Victoria in the Seychelle Islands with a motor drive to the Islands of Mahe, where a number of native arts and crafts have been arranged. Kenya Colony is next visited, with a call at Mombasa. A "ngoma" or series of tribal dances will be performed at Kilindini. Next comes Zanzibar and Madagascar, visiting Mahanga, one of the most interesting ports in the Indian Ocean. Three days will be spent in the Union of South Africa, with a motor drive in and around Durban and an excursion to Pietermaritzburg. Port Elizabeth and Cape Town will be visited, and around Durban and Cape Town islands are visited.

The Franconia then makes a long voyage across the South Atlantic to the River Plate. The Franconia calls at Montevideo and in Uruguay and passengers may visit Buenos Aires by special steamer. Turning north the

cruise liner arrives at Santos and Rio de Janeiro, where there will be visits to a snake farm in the former city and to the magnificent scenic points in the capital. The last port of call of the Franconia will be at Barbados, arriving back in New York on Friday, May 31. She will have touched at 35 ports on her 139-day cruise, covering 37,070 miles. The Franconia is at present engaged on a series of cruises between New York and the St. Lawrence, calling at Newfoundland, the Saguenay and Quebec.

Salvaging Gold From Chimney

U.S. Assay Office Reclaims It From The Soot

Since the U.S. government devaluated the dollar, almost doubling the value of every scrap of gold, the Assay office in New York has been using every conceivable precaution in its melting room to conserve the metal. The Assay Office is housed in a relatively new building, white and severe, at the corner of Old Slip and South Street. One of its important installations is called a fume precipitator—in reality, a series of metal sleeves, each plumed by a chain. Alternating currents run through the chains and the sleeves; and, as smoke passes up the chimney, the soot particles, containing minute quantities of gold, are dashed from the air by this electric barrage, and fall to the bottom of the fume.

This precious residue is collected once or twice a year by men who go into the basin of the chimney and shovel it out. The Assay Office realizes \$10,000 to \$15,000 on the sale of gold reclaimed from chimney soot. Even the dust on the walls is collected for gold.

Easy To Remember

The debate over "I" and "me" goes on unendingly, but there is one thing that we ought to stop. It is the phrase, "between you and I." If the people who use it would reverse the pronouns and say "between I and you," they might learn to use the correct form, but every day we hear from the most unexpected sources the phrase "between you and I." The correct form, of course, is "between you and me."

Millions Of Acres Of Finest Wheat Lands In West To Come Under Reclamation Plan

Reclamation of millions of acres of the finest wheat land in the world, despoiled by successive years of drought, is the immediate object of four governments in Canada, the federal, Manitoba, Saskatchewan and Alberta.

Plans have been laid already to relieve distress in the dried-out areas of the prairies, feed the impoverished people, provide seed for next year's crops and look after millions of half-starved cattle and horses. But there is another object in mind—how to reclaim for the land its binding and freshness due to years of drought.

For months the Dominion department of agriculture has been experimenting with grasses gathered from all parts of the world to determine the best to act as a binder to the wind-tossed soil of the prairies. Agricultural experts believe many parts of the West never will regain their paramount place as wheat producers until the soil has been rebound and rejuvenated. Eventually it may lead to reforestation and irrigation on a wide scale.

Some idea of the vastness of the problem may be gathered from these figures: In Manitoba, 1,000,000 acres in 13 municipalities affected by the drought. Sixty per cent. of the cultivated acreage of Saskatchewan has been dried out and 40 per cent. will not produce a marketable crop this year. The dry area in Alberta is 2,000,000 acres, a decrease from last year. Some sections of the prairies have had five crop failures in a row.

Agreements were signed last week between the Canadian railways, the federal government and the prairie governments providing reduced rates on livestock feed moved to the dry sections and cattle and horses shipped to northern ranges. It will be impossible to transfer all the half-starved stock from the dried-out areas and some are not worth the cost of feeding. It may result in wholesale slaughter of cattle to be processed into hog feed.

A trickle of emigration has started from the dry sections but this is not regarded as practical on any large scale. In Saskatchewan, for instance, 40,000 families, probably 200,000 people, have farms in the drought sections. About 100 families have deserted their farms in the south and selected new land in the north, but this movement is limited to the available acreage of unbroken land of good quality. In addition, western farmers are the world's best optimists and, like everybody else, dislike leaving their settled farms.

It is impossible to say how much the Dominion will spend this year in drought relief. It has been placed between \$15,000,000 and \$20,000,000 in addition to direct relief for the people. It will be impossible to give an estimate until a decision is made on the campaign to reclaim the land and this is not expected for some time.

The Dominion already has taken steps to thwart speculators in hay, due to the needs of the west and the small Canadian crop. It has passed regulations forbidding the export of hay without license. This will conserve the Canadian supply in view of crop failures in the United States and Washington's removal of the \$5 a ton tariff.

A Remarkable Test

Wireless Telephone Talk Heard Distinctly Over Extremely Long Distance

Wireless telephone link has been established between India and London and recently a telephone conversation between the Collector of Karachi and a London Post Office official was heard distinctly when the first test was made of the proposed wireless telephone service between the two cities. This is remarkable, because the voice traverses 2,000 miles of land line, via Lahore, Agra, and Surat, before being sent out from the Kirkee wireless station.

There's always the bright side. You can't poke the nose finger into an electric fan twice.

W. N. U. 2062

Inventors Seldom Get Rich

Thousands Of Gadgets Are Never Granted A Patent

A window pane, which, on being broken by a burglar, creates an intense vacuum, drawing the hapless intruder into the room and holding him on the floor until captured, was among the 20,000 inventions of last year which were not granted patents. "Perpetual motion machines are the most popular, and about a hundred 'fresh' discoveries of this kind are made every year," a well-known firm of patent agents informed a representative.

By Ruth Rogers

JACKET DRESSES ARE ALWAYS FAVORITES FOR IN-BETWEEN SEASON WEAR WITH SMART WOMEN

You'll like to-day's model for its smart individuality. It is grey-blue, plaided in wine novelty rayon with woolen effect. Plain wine made the rever jacket collar, with wine button trim. The jacket is the youthful box type. The dress has easy to handle rayon sleeves. The bodice buttoning at the front, creates a very slimming line. Plaids lend animation to the slender skirt.

Angora plaids in bright colors, crepe marocain, heavy novelty crepe silk, lightweight woolens, etc., are nice ideas for its development.

Style No. 484 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. See pattern envelope for material requirements. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap sent carefully.

How To Organize A Poultry Pool

Preparing Poultry For Shipment Important Part Of Business

Producers' poultry pools, where farmers assemble, box pack and make ready their own poultry, are growing in popularity and utility in practically every province of the Dominion, and the reason why there is not a poultry pool in every district is because the farmers, however willing, have not had the time to find out exactly how to proceed about the business. Markets pay a premium for poultry of the highest quality, when properly graded, box packed, and government inspected.

In all this work, the Poultry Services of the Dominion Department of Agriculture play a leading part, assisting the farmers in every way in organizing and carrying out the working arrangement of pools. These services have just issued a pamphlet on why and how to organize a poultry pool, and the pamphlet is all the more welcome to the many farmers interested in that it places the matter in a nutshell. It shows that the assembling and preparing of poultry for shipment is as much the business of producers as the actual growing of the birds, and the overhead expenses of preparing for shipping is largely governed by whether or not every member of the pool does his share of the work. The steps to be taken to form a pool are clearly set forth.

Aid U.S. Farmers

Large Sums To Be Paid Out To Help Agriculturists In States

More than \$1,000,000,000 is destined to go into the pockets of United States farmers through the agricultural adjustment administration before the end of 1935.

Cotton, tobacco, wheat and corn-belt benefit payments will total \$779,402,000, officials estimated. Of this sum \$282,882,519.21 had been paid out up to August 25.

Of the latter payments, cotton farmers have received the lion's share, \$152,510,793. Wheat farmers netted \$67,781,951; corn-belt farmers, \$46,815,988, and tobacco growers, \$15,773,785.

In addition to the \$779,402,000—which is being paid out to farmers for controlling production—cattle raisers will net about \$120,000,000 and sheepmen approximately \$7,500,000 by selling drought-stricken animals to the government. This raises the total for farm adjustments close to \$1,000,000,000.

The figures do not include benefit payments under the sugar program which is still being drafted.

The Latest Umbrella

Umbrellas for shoppers have just appeared in London. The top of the handle contains a dainty pencil. The entire handle may be turned and lifted to expose a surface on which shopping and other notes may be made and easily deleted.

Who knows but that as now powerful engines pull the freight cars, some day a powerful plane will pull half a dozen gliders at its heels—the freight train of the air.

Interesting History Of Panama Dates Back To The Time Of The Earliest European Explorers

Sheep In Western Canada

New Government Map Shows Large Sheep Ranches

A map showing the location of all large sheep ranches in Western Canada has been prepared by the Department of the Interior at the instance of the Economics Branch of the Dominion Department of Agriculture to assist sheep ranchers, farmers, and feeders to make contacts with one another. The map may be obtained from G. S. Herlinger, secretary of the South-western Saskatchewan Wool Growers' Association, Maple Creek, Sask.; N. T. McLeod, secretary of the Southern Alberta Sheep Breeders' Ltd., 1221 2nd Ave., Lethbridge, Alta.; Miss M. E. Lauder, secretary, British Columbia Sheep Breeders' Association, Kamloops, B.C., or the Economics Branch, Department of Agriculture, Ottawa.

The purpose of the map is to improve the contact between ranchers and those wishing to feed lambs or purchase sheep. It is pointed out that there is a considerable movement of such livestock from ranches to farms particularly during the fall of the year for feeding purposes. Lambs are often contracted to farmers and breeding ewes are sometimes sold to farmers on a poundage of lamb basis. Copies of standard contracts used for such purposes may also be obtained upon request from those mentioned above.

In the case of ewes purchased under contract it is the custom for the rancher to deal directly with the farmer. This makes it desirable that the farmer be located within driving distance or a maximum of approximately fifty miles from the rancher with whom he is dealing.

The location and address of sheep ranchers is given on the map and those interested in the feeding of lambs or in the purchase of ewes under contract or otherwise may correspond directly with ranchers or with the secretaries of the associations mentioned.

The preparation of this map is one of the results of an economic survey carried on in behalf of the sheep ranchers of Western Canada by the Economics Branch of the Department of Agriculture with the co-operation of the Dominion Experimental Farms and Livestock Branches.

Well Defined

An English bishop has said that he is not sure what a beauty parlor is. A beauty parlor is a place where a woman is quite content to look her worst for several hours on any day in which she wants to look her best for a few minutes.

Lifeguards to the number of 4,000 are on duty in England during the summer. More than 1,500 are women.

Lightning conductors will be fitted on historic trees in Czechoslovakia.

SPEEDY CANADIAN GIRLS CREATED NEW RECORD

On the first day of the British Empire Games at the White City Stadium at London, this Canadian quartette created a new British record of 1 minute 14.25 seconds in the Women's 660 Yards Relay Race. From left to right: A. Dearnley, E. Meascher, L. Palmer and B. White.

The Republic of Panama, divided by the narrow canal zone strip, is one of the least known of the nations on the Western Hemisphere, and yet practically every school child knows of the Panama Canal, the great American-built, American-owned waterway connecting the Atlantic with the Pacific.

Panama the Republic is one of the infants of the New World, both in area and age. Yet its history dates back to the time of the earliest European explorers of America.

Columbus cruised in Panamanian bays on his fourth voyage in search of a short cut from Europe to Cathay. Balboa crossed this lean neck of land to discover the Pacific ocean. Later it enjoyed a high rank among the leading Spanish colonies because rich men on the West coast of South America preferred to cross it rather than to "double" Cape Horn on their way to Europe.

Panama's real advancement, however, dates from 1903, when the country changed from a department of Colombia to an independent state.

In 1902 the United States by treaty offered to pay the government of Colombia \$10,000,000 in gold for concessions which would make possible the building of a canal across Panama and provided for an annuity of \$250,000, beginning nine days after the ratification of this agreement. It further provided that the territory comprising what would soon become the building of a canal across Panama and provided for an annuity of \$250,000, beginning nine days after the ratification of this agreement. It further provided that the territory comprising what would soon become the building of a canal across Panama and provided for an annuity of \$250,000, beginning nine days after the ratification of this agreement.

The Colombian senate voted against the acceptance of the treaty, and as a result on November 4, 1903, Panama declared itself an independent republic. The United States troops prevented the land of Colombian forces at Colon and Acapulco, and the new republic was formally recognized by the United States on November 13, 1903. The treaty with the new republic was concluded a week later.

Under the treaty the Republic of Panama granted to the United States a zone of land ten miles in width and extending five miles on either side of the centre of the canal, with the proviso that the cities of Panama and Colon should not be included within the grant. The compensation granted to Panama for this concession was the same as provided in the former offer to Colombia. The area measures 32,358 square miles, with a population of half a million.

Actual work on the canal was started in 1904, but little progress was made until 1907, when the work was turned over to the engineer corps of the regular army under the direction of General G. W. Goethals, under whose efficient administration the gigantic work was brought to a successful issue in August, 1914.

Shaped like a crawling caterpillar, with its head touching Costa Rica on the north and its tail reaching southward to the forested mountains of Colombia, Panama, equal in area to the State of Maine, is known to few people beyond its borders because its fame is overshadowed by the importance to the world of the Panama Canal and the Panama Canal Zone.

Panama City, visited by nearly every passenger who debarks at Colon, from the frequent Mauretania cruises, the largest to call at Colon, is on the Pacific side of the canal. They find Panama City a shoppers' paradise. The bay is still a fisherman's paradise. "Panama," in the native Indian tongue, means "abundant fish."

When Morgan, the pirate, sacked old Panama City in 1671 more than 175 pack animals were needed to carry away the gold, silver and other loot previously taken from the natives of the Spaniards.

The old city was founded in 1516 and is the oldest town on the mainland of America. Tourists never fail to visit the old cathedral, the tower of which still stands, although the greater part of the church's walls have fallen in. A tree is growing where the centre aisle used to be.

Austria will build many highways

FRETFUL BABIES Quieted!

"If my three baby boys were restless with colic or peevish from their teeth I gave them a Baby's Own Tablet and they were soon asleep," says Mrs. T. Tweedy, 475 Millwood Rd., Toronto. "These sweet little tablets remove the cause of fretfulness and the child becomes happy and will again. All the common ailments of little folk are promptly and safely corrected by Dr. Williams' Baby's Own Tablets. Price 25c at your druggist."

Dr. Williams' **BABY'S OWN TABLETS** 25c

WORLD HAPPENINGS BRIEFLY TOLD

President Roosevelt has received a report saying employment in United States has increased 4,120,000 since he took office.

Dr. J. A. MacArthur, 86, pioneer leader of the medical profession in Manitoba for more than half a century, died recently in Winnipeg.

Extension of the recommendation system to supplant examinations in the schools was urged by Duncan McArthur, deputy minister of education for Ontario.

Veteran of both the Boer war and the Great War and former Arctic trader, Major M. Vancouver Marsden, 62, is dead at Vancouver from a heart infection.

The Australian cabinet considered British protests against the new import duties on Lancashire textiles and ruled the tariffs are to be maintained.

The Indian government's ban on flying over the northwest frontier will lengthen the London to Melbourne air race in October by 1,000 miles.

Henri Gagnon, Quebec, president of the Canadian Press, and managing director of the newspaper Le Soleil, has been elevated to the rank of an officer of the Legion of Honor of France.

Persia has informed the League of Nations it will stand as a candidate for China's seat in the assembly. China's mandate expires this year and Persia considers itself qualified to represent Asia.

Captains of Great Lakes steamers say low water levels in the lakes have uncovered rocks and sandbars, and cargoes have had to be considerably reduced from other seasons. Vessels have grounded this summer in places previously considered safe, they declared, and the captains had to stay on the bridge continuously.

Stay Was Uncertain
A social worker on her first visit to a prison was greatly impressed by the sorrowful attitude of one man she found. "My poor man," she sympathized, "what is the length of time you'll spend here?"
"All depends on politics, lady," replied the mournful one. "I'm the warden."

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder shepherds the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refill — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

Cheap Television Sets

New System Developed Promises Sets At Low Cost

A new system invented by Mr. R. W. Hughes, of Plymouth, England, may result soon in the production of cheap television sets for all.

Mr. Hughes said he thought a television receiver, built with light source and amplifier, could be mass produced to sell at \$10 or less.

With his somewhat crudely constructed apparatus, Mr. Hughes is able to project a 100-line picture on a screen two feet square.

A system of vibrating mirrors causes a small but instant spot of light to travel over the screen and form the images.

Mr. Hughes is also developing an apparatus which, he claims, overcomes the problem of synchronizing—one of the great difficulties of television—and also holds the picture steady for considerable periods.

Firms in this country as well as in Germany and the United States have been interested in the invention, and, it is said, that successful negotiations have been concluded with a British company.

Mr. Hughes has been working for nearly two years on his new apparatus and has built a special transmitter to test his receiving apparatus at any time.

Your Handwriting Reveals Your Character!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

Editor's Note: This is the first of a series of fascinating articles on this very interesting subject of Character Reading from Handwriting. The author, a well-known handwriting expert, has been asked to make following this article.)

There is always something thrilling in the mysterious. For thousands of years, people have paid money to fortune-tellers in return for a glimpse—sometimes accurate, if fussy; and sometimes, amazingly prophetic—of the future. Even through the ages, people have yearned for an opportunity of tearing aside the veil hiding To-morrow from To-day. There will always be a thrill of the mystical or occult in these foretellings of the future.

The astrologist who looks at the stars, and predicts your future from them; the soothsayer who peers into the globe and tells your fortune; the palmist who scrutinizes the hand for the tell-tale lines it shows; the phrenologist who searches your head for the revelations it discloses, down to the ever-popular amateur at the tea-cups, who focuses on the tea-leaves—all have their followers who swear by them.

And, marching a path that is built on solid scientific deduction, the Grapho-Analyst is gaining an ever-increasing body of adherents who find his analyses of character oftentimes sensationally accurate.

Grapho-Analysis, the science of character, tells from handwriting—what is it really?

Robert Sadek, the famous European cyrologist, says: "There is no such thing as handwriting, but only brainwriting." This is because the impulses and motions come from the brain. Writing is no mere muscular act. If you think it is, try to write a letter while reading a book!

The Physicians' Times Magazine some time ago made the statement that "the nerves of the extreme finger-tips are extraordinarily sensitive, and traces of grey matter, similar to that in the brain, may be found."

Throughout the world, Grapho-Analysis is gaining recognition as a practical science. In a number of European universities and colleges the subject is being studied as a regular part of the curriculum. In the everyday affairs of life it is finding increasing application.

Business men, teachers and doctors are using it to supplement their own specialized knowledge. Indeed, many of the largest commercial undertakings in the world submit to grapho-analysis the handwriting of applicants for important positions: it is being used more and more frequently in criminal and civil courts, and even lovers, hesitating before stepping off the brink of matrimony, consult a Grapho-Analyst for an analysis of the handwriting of their intended bride or bridegroom.

Do you want a personal analysis of your handwriting? Do you want to know what your friend's handwriting tells of his character, analysis and open the doors of opportunity to you and certainly, it will astonish you with its revelations of character and talents. Send a letter in your normal writing, and state your date of birth. Enclose with the coin, (for each specimen) and be stamped addressed envelope to: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 175 McDermott Ave. E. Winnipeg. Please allow at least two weeks for a reply, which will be mailed as soon as possible.

Pirates Bold

Are Now Incorporated Into The Chinese Army

The pirates are soldiers now. Thus has fate dealt with the 60 Chinese marine marauders who were promised a firing squad for creating an international incident two months ago. The pirates boldly commanded the British steamer Shantung and kidnapped six British subjects and 18 Chinese.

The pirates were frightened into freeing their captives and lost most of the loot they unloaded from the steamer. But the pay-off "is" that they have been taken into the Shantung provincial army.

"They were sincere in their desire to surrender and become soldiers," explained Han Fu-Chu, governor of the province, who consented to make the pirates part of his army.

A "sweeping search" for the kidnappers was ordered when both Great Britain and the United States became aroused.

Young Farmer: "What happened to those nut paddings you made yesterday, Jane?"

Young Wife: "As you didn't like them, I gave them to the ducks."

Farmer: "So that's where my ducks have gone—they're sunk!"

ACTUALLY it takes less than 1¢ worth of Magic Baking Powder to make a big, three-layer cake. And you can depend on uniform goodness—every time. No wonder Canada's foremost cookery experts say it doesn't pay to take chances with doubtful baking powder. Bake with Magic and be sure!

MAGIC
MADE IN CANADA

"CONTAINS NO ALUM." This statement on every tin of Magic Baking Powder is a guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

SUNDAY SCHOOL LESSON

SEPTEMBER 9

HEZEKIAH LEADS HIS PEOPLE BACK TO GOD

Golden Text: "Who is gracious and merciful." II. Chronicles 30:9.

Lesson: II. Chronicles Chapter 30.

Devotional Reading: Psalm 72:1-6.

Explanations And Comments

Ritual Was Made for Man and Not Man for Ritual, versus 24. "Every thing regarding form is elastic in the interests of the soul." Nisan, the first month of the year, corresponding to our month of April, was the regular time for keeping the Passover, but in the reign of Hezekiah it could not be kept at that time because a sufficient number of the priests had not sanctified themselves (undefiled certain washings, abstinence and forms), nor had the people arrived at Jerusalem, owing to the fact that the temple was not cleaned until the sixteenth day of Nisan, and the fourteenth day was the time for beginning the Passover. Accordingly, the king had kashal, counsel, and his princes, and all the assembly in Jerusalem, to keep the Passover in the second month. The law (Numbers 9:10, 11) allowed those who for good reasons were prevented from observing the Passover at the regular time, to celebrate it in the second month, and the thing was right in the eyes of the king and all the assembly. Dr. Charles Reynold Brown contrasts Hezekiah's broadminded action with the narrow scruples of those chief priests and Pharisees who were intent upon putting Jesus Christ to death upon the cross at another feast of the Passover, and who would not venture into Pilate's judgment hall lest their holy feet should suffer defilement and make them unfit to share in the sacred feast of the Jewish Church.

The Royal Proclamation to Judah and Israel, verses 1 and 15. So a decree was issued for every one, from Beersheba to Dan, to come to Jerusalem and keep the Passover. The customary phrase for the length of the land was "from Dan to Beersheba." The character, however, of the writing the history of Judah naturally mentions the southern city first. A reform was needed, for they had not kept the Passover in great numbers in such sort as it is written: see Exodus 12:6. Local sanctuaries had been established throughout the land (2 Kings 18:4); Hezekiah would re-establish the supreme importance of the temple, so he wrote letters to all Israel and Judah and sent them throughout the land by the posts, or couriers. His message was: Ye children of Israel, turn again unto Jehovah, the God of Abraham, Isaac, and Israel (such as reference to the Hebrew fathers is common in the Old Testament); it served to remind the people of God's favor to them in the past, that he may return to the remnant that are escaped of you out of the hand of the kings of Assyria."

The Assyrian invasion of Samaria had but recently happened and Hezekiah urged those who had not been brought away to activity not to bring upon themselves the punishment that had just befallen their brethren. He said, "Do not stand necked as your fathers were, but yield yourselves unto Jehovah, and enter into his sanctuary," he counselled.

No Free Advertising

A violinist was very much disappointed with the account of his recent printed in the paper of a small town.

I told you three times," complained the musician to the owner of the paper, "that the instrument I used was a genuine Stradivarius, and in this story there was not a word about it, not a word."

"That is as it should be. When the Stradivarius Company advertise their fiddles in my paper, under 10 cents a line, you can come round and tell me about it."

Little Journeys In Science

INSECTS

(By Gordon H. Guest, M.A.)

Insects are our greatest friends—and our greatest enemies. Some aid man and some harm him. Once in the history of the earth it appeared as if they might inherit the earth and gain control of it. Scientists have counted 10,000 different kinds of insects that are living to-day. Of this vast number man has domesticated and used the products of the labor of only one—the honeybee.

It is of interest to know that an insect that can crawl through the eye of a needle has a little heart and other organs. Insects reverse man's method and wear their skeletons outside. They are without lungs but get to every part of their bodies through a large number of microscopic tubes. This system of obtaining air works so efficiently that it is doubted whether an insect's blood is ever impure.

In regard to intelligence, many an insect has more brain-power, in proportion to its weight, than have human beings. A spider is a very clever bridge-builder. In Texas are found ants which clear the ground around their hills of all plants except those that produce such seeds as it wishes to eat. Bees have, in proportion to their weight much more intelligence than man. House-flies are not noted for their brain power but they are experts with their wings, which they flap 320 times a second; bumblebees, 240; wasps, 110; dragon-flies, 28; and butterfly, 9.

Among the most useful insects is the bee, which supplies honey, and in some countries produces bee bread for the support of human life. Silk-worms furnish material for clothing, and their culture is an important industry in many countries. The common wood ant is used extensively in Europe for the manufacture of vinegar. The cochineal insects supply a valuable coloring material, while even the grub is used as a food in the West Indies.

Among the insects which are most harmful to man may be included the Hessian fly, potato bug, chinch bug, army worm, cotton boll weevil, cotton boll moth, and grasshopper, all of which attack growing crops.

Must Be Improved

Canada Must Raise Better Hogs To Capture Market

The Canadian farmer lost \$12,000,000 in 1933 by reason of the fact Danish hogs were better than Canadian hogs, J. S. McLean, president of Canada Packers, says in the annual report. Unless Canadian hogs are not moved for the market, the same amount will be lost each year.

"The securing of this \$12,000,000 lies in the hands of the Canadian farmer," he continued. "He alone can do the job. And if it is done, he will reap the entire benefit." The "certain lack of confidence" existing between the farmer and the packer was due chiefly to the farmer.

Not What He Meant

Two English tourists were standing gazing at Niagara Falls.

"Isn't it marvellous!" said one. "Just magnificent. To stand here makes a man feel like a little grub." "You're right," replied the other. "I've had nothing to eat since breakfast myself."

GRANT HALL, VICE-PRESIDENT C. P. R. DIES IN MONTREAL

Montreal.—A career intimately associated with the opening up of Western Canada was ended here with the death of Grant Hall, 70, vice-president of the Canadian Pacific Railway.

Mr. Hall was taken to hospital Aug. 11 suffering from a stroke. His condition at first improved and gave hope he might recover, but he failed rapidly and his physician warned the end was near.

Although he was a native of Montreal and although he returned here to occupy the high railway post he held at his death, it was chiefly on the western lines that his capacity as an executive was developed.

He began his railroad career with the Canadian Pacific Railway as a fitter. In 1886, he joined the old Intercolonial railway as a general locomotive foreman, stationed at Moncton, N.B.

In 1898 he was again in the service of the Canadian Pacific Railway and held the position of general foreman at McAdam, N.B. Shortly after the turn of the century he went west as general foreman in Winnipeg.

In 1902 he went to Revelstoke, B.C., as master mechanic, then returned to Montreal as assistant superintendent of rolling stock, eastern division.

In 1904 he became superintendent of motive power, western lines, and in 1908 was made superintendent of motive power for the company.

From 1911 to 1912 he was the company's assistant general manager and in 1913 became general manager for western lines at Winnipeg. Two years later he was made vice-president and general manager at Winnipeg.

The position he held at his death, vice-president with jurisdiction over all lines, was his since 1918.

He was credited with having a thorough knowledge of all railroad problems, and was noted for his ability to avoid friction of all kinds and was known as a hard worker.

Mr. Hall held the affection of his men and was frequently chosen for the company's representative in arbitrating with the railroad unions.

He was born here Nov. 7, 1863. He married Mary E. Haley and had a son, William Hall, and a daughter, Madeleine Hall. He was educated at Bishop's college, Lennoxville, Que., and entered railroad work shortly after.

He was a member of several clubs including the Manitoba club, Winnipeg, and Vancouver club, Vancouver, and the Rideau club, Ottawa.

May Abrogate Treaty

Japan Will Not Adhere To Washington Treaty Unless New Plan Is Adopted

Tokyo.—Japan will abrogate the Washington naval treaty of 1922 unless other signatory powers "give evidences of favorable consideration to a new scheme for limitation of armaments which Japan will propose," a foreign office spokesman announced.

The spokesman indicated the proposal would be made during London discussions preliminary to the 1935 naval conference and that the attitude of the powers during and after this conference would be closely watched.

A Woman President

Predicts A Woman Will Head U.S. Government Within A Generation Chicago.—A woman president of the United States within a generation was predicted by Miss Lillian D. Rock, secretary of the National Association of Women Lawyers.

"I expect that within my own lifetime some brilliant woman will make her way from the ballot box to the presidency," she told the association's annual convention.

"All of our country's presidents have gone forth from women. What is to prevent woman herself from going forth to occupy this exalted post?"

W. N. U. 2062

Assistance For B.C.

Ottawa To Advance Funds For Relief Purposes

Victoria.—The Dominion government will assist British Columbia in the financing of direct relief to March 31, 1935, which will amount to approximately \$2,800,000 in addition to the \$1,200,000 grant from the federal government, John Hart, minister of finance, announced.

Mr. Hart returned here from Ottawa, where he spent several weeks negotiating for financial aid for the province.

He also completed arrangements for a loan from the Dominion of \$2,000,000 to meet a maturing obligation in New York and also for an advance of \$375,000 on account of the deficit in the accounts of the last fiscal year.

He also negotiated a loan to the province of \$1,000,000 for advances to municipalities unable to carry their share of direct relief.

Mr. Hart stated the Dominion has agreed that, on all the province's indebtedness to the Dominion, the interest rate will be 4 1/2 per cent. instead of 5 per cent., in line with a general fall in interest rates.

The minister said Prime Minister R. B. Bennett had agreed to loan the province \$1,000,000 for a public works program as the result of representations made by Premier T. D. Pattullo for a loan of \$5,000,000.

Sale Of Government Cars

Auction Sale In Toronto Stadium Nets About \$37,000

Toronto.—The University of Toronto's stadium, scene of many famous gridiron struggles, was thronged with a crowd of more than 5,000 to witness the Heppburn government's wholesale auction of automobiles used by officials and ministers of the former Henry government.

When the noise had died away and the auctioneers had completed their task, 87 cars had been disposed of at a sum aggregating about \$37,000.

A large sedan that carried former Premier George S. Henry of Ontario a bit more than 48,000 miles was sold for \$1,500.

Before the sale, 13 cars were withdrawn for use of the department of health, leaving the total number to go on the block at 87.

As the former premier's car was hoisted onto an elevated runway, Auctioneer M. Moore of Aylmer, Ont., exhorted the crowd to bid up, saying: "You will be proud to tell your grandchildren you bought the first government car sold at public auction, the car of Premier Henry."

There were numerous shouts of "ex-premier."

An expensive, but six-year-old car in which the late Hon. E. A. Dimpus used to ride, was sold for \$600. It has travelled 70,093 miles. A 1930 model of a less expensive car went for \$400. It has done 115,307 miles.

New Mining Company Has Been Incorporated

Capitalized At Ten Million And Will Promote Gold Production

Toronto.—Canadian Gold and Metals Mining Company, Limited, with authorized capital of \$10,000,000, has been incorporated and will launch into the mining field shortly to promote gold production and to provide a medium for investment in mining securities.

Fifty per cent., or \$5,000,000, of the company's capital is to be invested in dividend paying mining stocks, listed on a recognized exchange, or government bonds. Twenty per cent. is to be invested chiefly in mining stocks listed on an exchange but not necessarily dividend paying, and the remaining 30 per cent. is for speculative purposes.

Among the directors are Sir Henry Drayton, K.C.; Hon. W. D. Ross, J. W. Hobbs, E. W. Beatty, K.C., president of the Canadian Pacific Railway and David Sloan, of Vancouver.

Noted Explorer Dead

Sydney, Australia.—Sir Edgeworth David, noted explorer who led an expedition to the south magnetic pole in 1909 and also took part in Sir Ernest Shackleton's early-century Antarctic explorations, died at his Hornsby, N.S.W., home.

HON. ARTHUR W. ROERUCK

Attorney-General for Ontario, who is studying ways and means of tying up the assets of relatives and friends of any kidnapped person in order to prevent payment of ransom, as an outcome of the kidnapping of John S. Labatt of London.

Drouth Problem

President Beatty of C.P.R. Opposed To Moving Settlers From South

Moose Jaw.—"The problem of the drouth areas in southern Saskatchewan cannot be solved by moving the people to other parts of the province. This would be unfair to the people involved, unfair to the drouth areas and a great mistake for the province," said E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, in an interview here.

The solution of the problem lies rather in the governments standing by the farmers with required assistance to bring them through the emergency, coupled with soil conservation on lands adapted to grain growing, and the development of grazing land for grazing purposes, and a policy of water development and conservation for use on the farms," Mr. Beatty said.

By water conservation and development, Mr. Beatty explained, he did not mean large schemes for irrigation works, which experience in this country had shown to be too expensive for the returns possible, but rather the development of adequate water supplies for farm use, including stock growing.

Favors Recommendation

Toronto.—Extension of the recommendation system to supplant examinations in the schools was urged by Duncan McArthur, deputy minister of education for Ontario. Responsibility for determining standing should be placed on those most intimate with the work of the students, he said.

Building Railway Line

Stewart, B.C.—Construction of the railway line of the Canadian Northern Railway from Stewart has been started under the charter grant of the company, calling for an expenditure of \$30,000 this year. The line is intended to run ultimately to Fort Graham, B.C., about 250 miles.

Billions For War

Fabulous Sums Spent In Europe For Armaments

London.—Confident the "eventual war" will be fought at high speed, the world is grooming fast iron soldiers to do the job.

While London and Paris army men tended to differ with the opinion of George Edward, fourth son of the king and queen, that the effect that trench warfare was obsolete, Great Britain and France nevertheless went forward with Italy in efforts to speed up movements of troops.

The League of Nations' armament yearbook published at Geneva estimated that the world spent between \$3,471,000,000 and \$4,399,000,000 gold for armaments in 1933.

A great part of this, army men agreed, went for tanks, aircraft and other fast fighting machines designed to wage war at maximum velocity.

While willing to admit the speed of highly mechanized modern armies would radically affect the old stalemate of trench warfare, French military leaders said they still believed trenches would continue to play an important part in warfare and held to their theory the infantry is still the backbone of an army.

The French intended to test transportation of troops by aeroplanes in air manoeuvres.

Great Britain's conviction that another war in Europe would be more open led to the creation this summer of the first permanent tank brigade.

May Become Permanent

Ontario Government Likely To Abandon Farm Loans Policy

Toronto.—The Mail and Empire says early abandonment of Ontario's farm loans policy is rumored at Queen's Park.

The paper adds: Hon. Duncan Marshall, Ontario minister of agriculture, is reported to be fearful of collecting anything like the \$55,000,000 which the province has now out with the farmers and for that reason is said, on coming into office, to have ordered the suspension which now, to all appearances, may become permanent."

If the present policy is abandoned, the paper says, it is likely the entire staff of the agricultural development board, including W. Bert Roadhouse, chairman, will be dispensed with and only a bare skeleton of the organization retained.

Demand Tax Rate Cut

Edmonton Taxpayers Threaten Strike Unless Rate Is Reduced

Edmonton.—Edmonton taxpayers took up arms against their city administration and, in a mass meeting at which every one of the 1,480 participants had to produce assessment notice to gain admission, decided on a tax strike unless expenditures are cut and a tax rate of 50 mills adopted. Redistribution of taxation liability and drastic cut in expenditures are demanded.

Edmonton's tax rate now stands at 64 mills, one of the highest in Canada.

SCENE OF \$427,000 HOLD-UP

In the foreground is seen the push-cart which concealed the machine gun used by the Brooklyn bandits who made the biggest cash haul in North America; the large car is the armored automobile held up by the gangsters. The police are shown questioning witnesses.

BETROTHAL OF PRINCE GEORGE IS ANNOUNCED

London.—The betrothal of Prince George Edward, fourth son of the king and queen, to the beautiful Princess Marina of Greece was announced in the court circular.

"It is with the greatest pleasure," the announcement said, "that the king and queen announce the betrothal of their dearly-beloved son, Prince George, to Princess Marina, daughter of Prince and Princess Nicolas of Greece, to which union the king has gladly given his consent."

An acquaintance that dated back five years to the young couple's first meeting in London ripened into romance in a Balkan setting, the picturesque Slovenian Alps of Yugoslavia, London understood. There the prince and princess have been staying at the summer home of Prince Paul of Yugoslavia.

The prince will be 32 on December 20. Princess Marina is 27.

The princess has inherited all the beauty and charm of her Russian mother and the pleasing qualities of her father, a brother of the late King Constantine of Greece.

The prince will be the third of the children of the reigning house to marry. His only sister, Princess Mary, the princess royal, was married in 1922 to Viscount Lascelles (now the Earl of Harewood). Their Majesties' second son, the Duke of York, was married in 1923 to Lady Elizabeth Bowes-Lyon.

The Prince of Wales, heir to the throne, meantime remains a bachelor. He passed his 40th birthday last June.

It was understood no plans whatsoever have yet been made for the marriage.

The prince, next to the Prince of Wales, is best known of the royal children in Canada. As an officer on H.M.S. Durban in 1928 he visited various British Columbia cities.

The tall, blue-eyed handsome prince and his fiancée have many tastes in common.

Among them is love for music. The prince is an accomplished pianist while the princess has been schooled as an amateur musician.

The princess also likes dancing and shooting—two amusements of which Prince George, as well, is very fond.

A thoroughly modern girl in every respect, the young Grecian princess likewise engages enthusiastically in outdoor sports, another trait calculated to endear her to England's sporting people.

The princess was educated in Athens, Paris and London, and speaks fluent French, English, Greek, Russian and German.

Fear Five Men Drowned

Thrown Into Columbia River When Cable On Cage Broke

Revelstoke, B.C.—Hope has been given up that there were any survivors among the five men who were thrown into the Columbia river when the cable of a cage in which they were crossing the stream broke.

One man of six in the cable cage, Roy Palmer of Winnipeg, reached shore and two others were seen struggling 400 yards down the rushing water, but apparently they did not reach safety.

The men were employed in the re-plant camp at 10-Mile on the Big Bend highway, and were amusing themselves on their off-work Sunday in taking an exciting ride across the river.

Mountain Climbing Tragedy

Government Camp, Ore.—After 19 hours of rescue efforts in which three rescuers nearly lost their lives, the body of Victor F. von Norrmann, 32, University of Washington student from Hunt Point, Wash., was brought out of the sulphurous crater of Mt. Hood.

No Decision On Trip

Ottawa.—No definite decision had been reached as to his projected journey to Geneva, Prime Minister R. B. Bennett stated after a lengthy session of cabinet council. It was understood the question was under consideration.

Golf Notes.

About twenty members took part in the Golf Competition held at the local course on Monday. Some surprisingly low scores were turned in, due perhaps, in some measure, to the instruction given by Ronnie McWilliams some time ago. The ladies particularly seem to have improved their game to a marked extent, and we can see changes in handi caps coming up. The men will have to look to their laurels!

How about the ladies picking a team, say of 4 or 6, to challenge the men?

The ladies as usual gave us a splendid lunch, and the bacon and beans went over (or down) big.

It appeared to be Lewis's day; shooting a good game, and making wonderful recoveries when in trouble, he turned in a net score of 59 to capture the major prize. Walter Samson had also to be right on his game to come in in second place. George Bryan never appeared to hit his stride and was having trouble with his iron shots. George had to be content with the Consolation.

Mrs Henry Oppertshauser won the major prize in the Ladies' section after a close tussle with Mrs Michael, who took 2d prize. Both these ladies were shooting pretty consistent golf and deserved the honors. Mr Donaldson was given the call for the Consolation.

The prizes in the previous competition were handed out. J W McCulla took the money in the men's section. In the Ladies' section Mrs Larson was 1st, with Mrs Henry Oppertshauser taking 2d.

In the Cup Competition, which will be coming up shortly, close contests should be the order of the day. We venture to predict a lady will take it this year.

Five-Hammed Porkers.

Don't some farmers have all the luck? Just when hams (cooked) are bringing a good price, a local big raiser has had the good fortune to have a hog with 5 legs. This happened when a batch of piglets came to the farm of Mr N M Carmichael, west of town. At last accounts, the 5 legged porker was still alive and kicking. All the rest of the brood are normal.

Stony Plain and District

Mr Ed Mayer is attending Alberta College, Edmonton.

Miss Josie Alt, a former pupil at S.P. High, is teaching at a school in the Wildwood district.

Miss Q Donaldson left on Sunday for Ottawa.

Miss Christina Pailer, Vegreville, was visiting this week at the home of her parents, in the West end.

Corp. Jim Smith and Mrs Smith were up from the South country last week, on a visit to old friends. They were accompanied by their 2 daughters. This popular officer, formerly in charge of the detachment here, is now stationed at Okotoks.

Miss Jean McLean and Mr R McLean, teachers at Blueberry, are grandchildren of the late Mr Malcom McKinlay who died just recently.

Manager Jac Becker has had some extensive repairs made to his Pool elevator, in preparation for handling the new crop.

REDUCING MADE HER LOOK YOUNGER

A Burden Of Fat Gone

Here is another case where the trim, slim figure of youth has displaced the coarse, fat outline of middle age. It is a housekeeper writing. She says:—

"I cannot say what weight I was, but I was very fat—a burden to myself. I have taken three bottles of Kruschen Salts, and now I am quite slender. I am over 56, and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful in hot water every morning till I used three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough for 'that' I'm worth their weight in gold."—Mrs. A. H.

Kruschen Salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which are allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly. Deciding to live in a modest studio until Peter is able to provide for her, Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not a penniless girl when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go to a cabaret to celebrate the victory, Peter and Camilla sit on the beach by themselves and talk sleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone to her studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finally has exhibited and sells Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartbroken, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the suggestion, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and Tiny Tots brand Peter a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth. During the voyage Avis tells Peter that Camilla smashed his scholarship exhibit in a fit of temper, and he believes her.

(Now Go On With The Story)

CHAPTER LIX

Camilla did not recognize her visitor for a moment, so long had it been since their last meeting. But after an instant, she recalled his name. "Oh—Mr. Matson, good afternoon."

He extended his hand, even before she offered hers in greeting, like the clumsy make-believe gentleman that he was. "The very same—Camilla. Lord, but you look swell." His frank glance admired her from head to foot. "And no wonder! Didn't you just go up in a rocket to success? What do you think, I listen to every one of your broadcasts?"

She smiled reservedly. "It's nice to know that someone listens in. But why should you be interested in children's stories?"

"I'm not. I listen just to hear your voice."

Her manner became more aloof. "Is that what you came here to tell me? If it is, I'm frightfully busy, Mr. Matson."

"Oh, see here, little fireworks, don't you get so peeved over a little thing like that. No, I came here to tell you something that I think you might like to hear. How about it?"

"Well?" she asked.

"I just heard the other day that they accused you of destroying Peter's exhibit piece."

"Well—I didn't. And Peter knows that."

"Wasn't it that clawish cat, Avis Werth, who accused you of it?"

"What difference does it make if she did?"

"I just thought she might be able to convince him that you did."

"That's a silly thing to bring up now. Peter is on his way to Paris, as you well know."

"So is Avis—and on the same boat," he watched her face closely for the effect, and was gratified with the result.

She grew alarmingly white, as if she had been struck a blow, Her head reeled sickeningly. But she rallied almost instantly and managed to reply bravely. "That's a strange coincidence, isn't it? At least, Peter will have pleasant company on his way."

"Lord, you're a brick, Camilla. I know how that gets you. You can't fool me. That's why I came here to help you, because I've always been crazy about you and can't bear to see you get a raw deal. Want to know who destroyed the statue?"

She hesitated for a moment. "It would be rather a relief to have the mystery solved."

"Well—I did it."

Her startled eyes met his with amazement. "You? But why—and why should you confess it to me?"

"One at a time, if you're going to give me the third degree," he held up his hand in mock protest. "First, I've told you to give you a square deal. Reason given above. Next, I did it for two reasons: for revenge on Peter for a former little incident which you may recall, and to increase the possibility of my own success. There was no doubt that he was one of my best rivals. That eliminated his chances, I thought, and increased mine by one. The result proved that I was right there. I was the Nels Nelson whose 'Flight' was second and lost the scholarship. So Peter was my best rival, even with a substitute entry." He laughed harshly. "I may even have bettered his chances by what I did, and hurt my own. Well, he won. Oh, yes—one thing more. You will wonder how I did it. I slipped upstairs into his studio that night of the party, and was listening in the lower hall when you were discovered there. I thought it was a lucky break for me."

He paused.

"But I still don't understand why you are telling me. No one ever suspected you. Don't you know that I could have you arrested?"

"You won't," he said confidently. "Neither would Peter. After all, I have to admit that he's one swell guy. Besides, he won't, because he knows his kick? That group probably had more kick in it than a dozen 'Inspirations'. But there is more to my story, girls. Not only did I put Peter where he wanted to be by my rotten trick, but I landed myself in a cloud with a silver lining. Maybe I don't deserve it, but just the same I am there and riding pretty."

"Peter can have all the Paris scholarships he wants—me for the good old green. I only wanted to go to Paris to tide over the depression, anyway. First crack after the exhibit, one of the big money kings buys my 'Flight' and gives me an order to do a larger copy for the entrance to the airport. Then I almost collapsed when fortune threw

me arms around me again, and a novelty dealer bought the patents on some little modernistic figures that he will manufacture by thousands to put in the five-and-dime stores. What do you say, is that a break or isn't it?"

Her face lighted with genuine admiration. "Indeed it is, and I'm awfully glad for you. I hate to think that you could do a thing like that to Peter—but since it came out all right, there must have been some reason in the whole plan. I'm glad you told me about it, Gus. I appreciate that it does mean something to me. It would have been a dreadful mystery to have hanging over you for all our lives. But don't be revengeful and petty like that again, will you?" Camilla implored him.

"Not on your life, I won't. Me for the straight and narrow—and prosperity."

"I hope it continues for you," she smiled. "You have some fine things in you to develop. I'm sure."

"Gee, but you're sweet. Tell you what, I might even write you a statement of confession to show to Peter sometime, if you will promise me to burn it right away after he reads it. I don't care to have incriminating evidence like that around."

"You don't need to do that. If you wish me to tell Peter, I shall. He will believe me, of course. And he will be relieved to know how it happened. I'm sure he never believed that you did it, anyway."

"Well, I'd advise you to keep your eye on Avis Werth."

Camilla laughed with a deprecating gesture. "Avis doesn't worry me. But she did not believe what she said, and when Gus Matson had gone, she sat huddled over her drawing board in abject misery and despair. Her thoughts leaped the expanse of land and ocean which divided them, and she visioned Avis and Peter on the boat together for hours and days. Then Paris—Peter a stranger and a novice; and Avis as familiar with the city, the customs, the language, as at home. Avis: seductive, amorous, subtle, confident, with everything to her advantage. Angry tears stung in her eyes.

After a night of restless pacing the decks and turning in his upper berth, Peter emerged to a victory over his apprehensions. With bitter regret and angry resentment, he had slain love; and now looked upon the results dispassionately. Never again would he give rein to his emotions. Never again could he or would he permit himself to love anyone as he had loved Camilla. Work and success were all that made life worth while, anyway."

He would devote every moment, every effort, every emotion to those elements. He would be hard and cold and grasping like the rest of the world—take what he wanted when he wanted it, accept what pleased his fancy, ignore all obligations to sentiment. He suspected that was the creed of all successful men—and women. Well, he would join their ranks.

He thought of Avis with a mounting sense of appreciation and gratitude. He had her to thank for so many things: his financial security, her influence in his behalf via the influence of John Danforth, even the truth about Camilla's unforgivable act.

Three more days of such stern reasoning and gradual resignation to his new creed had done much for

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Werat's Powder—they stay snugly—because they can't slip. Prescribed by world's leading dentists—they know it's the best! Costs but little—any drugstore.

her arms around me again, and a novelty dealer bought the patents on some little modernistic figures that he will manufacture by thousands to put in the five-and-dime stores. What do you say, is that a break or isn't it?"

Her face lighted with genuine admiration. "Indeed it is, and I'm awfully glad for you. Then Paris—Peter a stranger and a novice; and Avis as familiar with the city, the customs, the language, as at home. Avis: seductive, amorous, subtle, confident, with everything to her advantage. Angry tears stung in her eyes.

After a night of restless pacing the decks and turning in his upper berth, Peter emerged to a victory over his apprehensions. With bitter regret and angry resentment, he had slain love; and now looked upon the results dispassionately. Never again would he give rein to his emotions. Never again could he or would he permit himself to love anyone as he had loved Camilla. Work and success were all that made life worth while, anyway."

He would devote every moment, every effort, every emotion to those elements. He would be hard and cold and grasping like the rest of the world—take what he wanted when he wanted it, accept what pleased his fancy, ignore all obligations to sentiment. He suspected that was the creed of all successful men—and women. Well, he would join their ranks.

He thought of Avis with a mounting sense of appreciation and gratitude. He had her to thank for so many things: his financial security, her influence in his behalf via the influence of John Danforth, even the truth about Camilla's unforgivable act.

Three more days of such stern reasoning and gradual resignation to his new creed had done much for

Peter's state of mind. Avis had calmly observed this very obvious change and took advantage of it gradually.

She increased her personal attentions to him; made little intimate ventures which became more pronounced as the days passed slowly; played upon her conviction that no matter how much a man renounces love, he is the eternal lover and recipient of love, that he cannot subsist without some demonstration of his emotional fervor. She flattered and entertained him, exerted herself to be attractive and desirable.

All unconsciously, Peter's attention and ardor transferred themselves to Avis, and almost before he was aware of what was happening, he found himself caught up and hurled along by the mighty force of his desires. Her nearness tantalized him, maddened him; until on that last magic evening of moonlight and sea breeze, when the emotions were strangely alive and alert with the anticipation of the morning's landing, he found his lips pressed to hers, himself holding her intoxicating fragrance in his arms, and all else oblivion.

"But that man you love," he finally reminded her.

"That man—is you, Peter darling," she confessed.

He was dazed. "Oh—I begin to see light."

She laughed softly. "Dear Peter, you are simply too good to be true. Now that you know—that are you going to do about it?"

"I don't know," he confessed dejectedly.

After a little while, she consoled him. "Oh, well, why think about it now? Tonight is tonight. Tomorrow is another day. Tomorrow, we reach Paris. There is so much to be done. You are going to be very busy. But we can see each other often, and when you are settled, we can have such glorious times together—while we wait."

She did not say what they would be waiting for, but it hung in the air between them.

His silence seemed to be an acceptance of her plans.

(To Be Continued)

THE RHYMING OPTIMIST

By Aline Michaelis

THE MAN WHO DREAMS

Who is so wrong as the man who dreams, Trading the real for the thing which seems, Shaping the days in the mold of his dream? Building a world for his whim or his creed?

Who is so foolish, so futile as he, Taking the false for reality? Weakly and cowardly well-content With a toy in place of the world God meant?

Waiting, while months and years slip past, Caught in a net that holds him fast, Shamed and bound in the web of his dream.

Losing the truth of creation's scheme Missing the zest of eager strife, The sweet and toll that are part of life.

Lacking in triumph art and mastery, Who is so cheated and fooled as he?

Prefers Motor Cars

Pope Pius Gives Up Horses And Closes His Stables

The Papal stables, which once had accommodation for sixty horses, have been finally closed down. Pius XII, the cardinal and prelate, has all taken to motor cars. No more will the streets of Rome ring to the tread of the stately coal-black horses which used to draw the carriages of members of the Sacred College. Sadi, all at the cardinal's prelate, his chief coachman, or, as he is entitled to be called, "His Holy Father's noble coachman," 80-year-old Rinaldo Jacchini.

Has Rare Specimens

The Dunedin National museum of New Zealand has two rare and perfect specimens of Mosa eggs. These large flightless birds, resembling the ostrich, only larger, and confined to New Zealand, are thought to have become extinct more than 500 years ago.

Ekimino believes consider a shiny nose vegetable.

Five Generations of Canadians have enjoyed its soothing lather

Little Helper For This Week

"The Lord bless thee and keep thee; the Lord make His face to shine upon thee and be gracious unto thee; the Lord lift up His countenance upon thee, and give thee peace." Numbers 6:24-26.

O Love how cheering is Thy ray; All pain before Thy presence

Care, anguish, sorrow melt away, Where'er Thy healing beams

O Father nothing may I see, Nothing desire or seek but Thee. —P. Gerhardt.

There is a faith in God and a clear perception of His will and designs which gives to its possessor confidence, patience, and a sweet composure under all varied and troubling aspect of events such as no man can realize unless he has felt its influence in his own heart. There is a communion with God in which the soul feels the presence of the unseen. One in the profound depths of his own being with a vivid distinctness, and a holy reverence, such as no words can describe. There is a state of union with God, not often reached, but it has been attained in this world, in which all the past, present and future seem reconciled, and eternity is won and enjoyed; and God and man, earth and heaven, with all their mysteries are apprehended in truth as they lie in the mind of the Infinite.—Samuel D. Robbins.

The Man In The Moon

Mythical Tenant Of The Lunar Planet Is Photographed

The man in the moon, who has posed for his first television snapshot.

After smiling down for years into the world's telescope lenses, the mythical tenant of the lunar planet has been photographed by television and the picture transmitted to a radio receiver.

Reprovision of the moon's likeness—the first recorded use of television in astronomy—was announced by Philo T. Farnsworth, 28-year-old inventor-scientist of Philadelphia.

Soured ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally unwell make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or reading only more the bowels and upset the liver.

What you need is to wake up your liver bile. Many liver pills pour the daily dose of bile into your system. Get your bile moving and your system will be healthy.

AUSTRALIAN WHEAT SITUATION

(Average Annual Wheat Production 180 Million Bushels)

Australia produces three important crops—Wheat, Mutton and Wool. Since the depression started much acreage formerly in grasses and native pasture devoted to the production of mutton and wool was turned to wheat-raising for the reason that the prices of mutton and wool fell relatively lower than the prices of wheat. Australia refused to withhold either her mutton or wool from the market. She pressed these products for sale at any price. In consequence she has today no surplus of wool, and so this last year the price of wool has made a remarkable recovery. It was this tendency to induce Australian farmers to take some acreage out of wheat and to devote it once again to the more profitable business of sheep raising.

SERVICE GARAGE, Stony Plain.

DON'T BUY IN THE DARK. SPEND YOUR MONEY FOR ADVERTISED GOODS.

Crops at Hualien Are Good.

The grain growers of this district are now harvesting the best crop this district has seen in four years. Wheat on summer fallow is expected to go 45 bu. to the acre; and oats from fallow land will thresh 100 to 125 bu., altho the latter have lodged badly, and on some fields is being cut only one way.

New Debt Act Now in Force

The Farmers' Debt Adjustment Act became operative in this province on Saturday last. Passed at the last session of Parliament, the legislation is expected to give to the debt-ridden farmer an opportunity of making arrangements and adjustments with his creditors which will permit him to stay on the farm.

Reduced Rates on B.C. Apples

Reductions in freight rates on apples from B. C. to prairie points ranging from 6c to 13c per cwt, according to distance from B. C., are announced by the Canadian railways. This follows strong representations made by B. C. apple growers, supported by the UFA Executive, and freight traffic department of the Alberta Government.

Heard at School Opening.

a large variety on hand, at low prices.

Chalk.

Sanigone, Excelsior, etc., in boxes of 1 gross.

STONY PLAIN WINS FROM BRIGHT BANK IN SUNDAY'S GAME.

A Very Close Game, in which the Local Team Had a Busy Afternoon.

What may probably be the last ball game of the season here was played on the local diamond Sunday afternoon. Bright Bank played a return game with Stony Plain, and some good action was seen at times.

Brightbank was first to bat, but none reached first base, the batters being knocked over by Beiderweden's pitching to the tune of one, two, three.

Stony then came to bat, but didn't score. The first run scored in the game was made by a Bright Banker.

The feature of the game was Rosnau's 2 bagger, bringing home 2 men. Up to this time the visiting team had been leading.

A full 9 innings game was played, Stony Plain being the winner by 4 runs to 3.

Stony's lineup: E Enders 2b, P Enders 1b, L Enders of, O Miller 2b, L Miller rf, Staub c, Duchoke II, Beiderweden p. Val M Kotscherowski referee.

Bright Bank battery: Moldenahner & Kreye.

Funeral of Mrs. Layney.

On Aug. 20, there passed away at her residence in Wabamun, Mrs Albert Layney, at the age of 64 years. The funeral service was held at the St Joseph's church, Rev Chas. Keenan officiating. She left to mourn her loss, besides her husband, a family of 6 sons Frank, Samuel, Edward, Wilfrid, Adolphus, George; and 4 daughters, Mrs Paul Loyes, Mrs James Savard, Mrs C Loyes, Mrs P Gaucher.

Duffield Doings.

Farmers here have been experiencing some difficulty in harvesting their grain this season, the frequent rain storms making grain cutting quite a problem.

The Duffield Athletic Club will hold a meeting tonight, to discuss the matter of paying bills incurred at the time their Sports Day was held last June. The Chairman of the Printing and Advertising committee is expected to attend.

Canadian Hay for the U.S.A.

A despatch from Winnipeg says that M. M. McGregor of Brandon, Man., has been appointed by the United States Federal Relief Administration for North Dakota as the sole purchasing agent for Western Ontario, Manitoba and Saskatchewan to buy hay, straw and other fodder to be shipped south to drought stricken farmers of North Dakota. It is said about 10 million dollars' worth of supplies will be required.

On the Side.

Ever since the summer they held the Rodeo at Winnipeg it has become more and more apparent that that popular Western institution can be staged too far East. Only last week, at Toronto, officials of the Rodeo at the Canadian National Exhibition modified the performance when Humane society officials complained of the treatment to calves. The next move no doubt will be to insist the doggies be handled with silk gloves.

—Local fishermen could with advantage make use of the hint which comes thru from the Coast. Some chaps out there were trying in vain for trout. The worms weren't attractive. In putting on a new worm one of the anglers let the creature fall into his mug of beer. He fished it from the bottom of his glass, and put it on the hook. In less than a minute he felt a bite. When he had hauled in his line behold! there there was a fine trout. The angler had quite a job to force the worm to let go of the fish.

But, then, y'know, fish "talse" are seldom swallowed.

—They're trying to jail farmers in the Mundara district for not obeying the orders of the Weed Inspector. One farmer failed to appear in Court when summoned, and a warrant for his arrest was issued. Neighbors to the farmer didn't like the looks of the crop of sow thistles on his farm.

—Some of the advertisements for the new radior say that they "need no installation." The zenith in radio manufacture will be reached, says an exchange, when one is devised which can't be installed.

The P.D.'s Corner.

'Tis a long while since this Col. has appeared, so I thought I'd start up again. I just got a letter from a boy friend of mine who's out in B.C. He'd always lived in a city, but went out on a farm in the Spring. He says—

Dear Pal: At last I have time to write, but I sure have been awful busy since I came to this farm to work. We got up at six in the morning and got to bed at six in the night because there ain't no pitcher show out here for nuthin' and we have nuthin to keep us up unless I of them kows git lost an' we have to hunt for him. When I cum here in the Spp, the farmer said he was goin' to get out his seed drill; I didn't no before that you had to drill seeds afore you planted 'em, and besides all the seeds are kornels, and they never drill kornels, do they, Pal? we farm about for hundred akers of land here; I dont know why they call the land akers unless it is cuz it makes yore tonsus able to work on it.

You know, Pal, we have all kinds of animals out here, kows, flafs, pigs, chickens, dux and hoases; I do not know why kows drink so mutch; I hev to pump for about a hour to water 'em of 'em—I wish they was kornels; the first day I was here when we at down to supper the farmer said We will let the new Boy say grace; I told him the only Grace I know was a gaff they alluffed so hard at this I thot I'd said something funny, when the last fella was leavin' here the lady said Now Henry you rite to us when you get to the next place. Henry said Well lady, if I dont git no more time for rising as I had here you'll never hear from me.

Well, I must close now as it'll soon be time to get up again.

The Kind He Got.

Two negroes who had not seen each other in five years discovered each had been married during that time.

"What kinda woman did youall get, Mose?" asked Rastus.

"She's an angel, Rastus; dat's what she is."

"Oh, boy! You sho is lucky! Mine's still livin'," Rastus muttered sorrowfully.
